- 3. Known Problems and Workarounds.....2
- 4. Problems Resolved in Minitab Connect 7.8.2.....3

### 1. New Features in Minitab Connect 7.8.2

- Salesforce Connector
  - Add support for using personal Salesforce application credentials for OAuth
  - Add support for different types of exports (upsert, insert, update, delete, GCIS)
  - Add support to choose between Single or Batch exports to Salesforce
  - Add ability to choose between using Salesforce Production or Testing environment
- Dynamics Connector
  - Add the ability to perform Insert or Update exports to Dynamics
  - Add the ability to choose to import raw data values instead of OData formatted values during import
- Stacked Area Graph
  - Users can now create Stacked Area Graphs within Minitab Connect Dashboards.
- Interval Plot
  - Users can now create Interval Plots within Minitab Connect Dashboards.
- Matrix Plot
  - Users can now create Matrix Plots within Minitab Connect Dashboards.
- Tabulated Statistics
  - Users can now create Tabulated Statistics within Minitab Connect Dashboards.

### 2. Maintenance Items in Minitab Connect 7.8.2

- FileImporter Locations> Emails not working as expected – deprecated

- Users can no longer use the inbox of an email address to import files as it was causing other Fileimporter location items to not work after the email item.

### 3. Known Problems and Workarounds

#### **Item 1**

When using the Safari internet browser in combination with having the “Monitor User” role, your session may be logged out unexpectedly. (229698)

WORKAROUND: Use the Chrome or Edge internet browsers with this role.

#### **Item 2**

When in Preview Mode if there is one categorical slicer on the dashboard with a very high number of levels, any other categorical slicer will not be able to open the dropdown menu until a selection is made on the first slicer.

WORKAROUND: Set a preset in Edit Mode before entering Preview Mode. In this case, all options will still be present on the right-side options pane before entering Preview Mode.

#### **Item 3**

Occasionally on larger Dashboards with many Views, some of the Views may not load in correctly when opening the Dashboard or during an Auto-Update. New Assets cannot be created using those Views and any Assets associated with them cannot be edited.

WORKAROUND: Open the View in Connect and re-save it (No changes are needed). After that either close and reopen the Dashboard or enable Auto-Update.

#### **Item 4**

Authentication issues when accessing a dashboard with a User’s personal API Key. Dashboards leveraging the newest dashboarding experience, by default, utilize restricted tokens when generating links for sharing.

WORKAROUND: Utilize a restricted token when sharing a Minitab Connect Dashboard. Restricted tokens can be created for legacy dashboarding experiences using the “Key(s)” tab when navigating the dashboard within the Minitab Connect interface.

## 4. Problems Resolved in Minitab Connect 7.8.2

The following issues are resolved in Minitab Connect 7.8.2

- Mashup tables not loading after changing to a new view or table (187314)
- Ensuring Slicers are loaded correctly on Dashboards, resolving cache (187316)
- SharePoint connector connectivity improvement (187292)
- OneDrive connector: help text updates (204779)
- Prep tool scrolling down error (255761)
- Connect password reset link spinning issue (255843)
- Help text cropped issue and typo in SharePoint Step 6 (255943)
- Improved handling for percent field (256039)
- Handling of errors when sharing a public/external V2 Dashboard (213369)
