1. New Features in Minitab Connect 7.8

- Dashboard Alerting Enhancements
 - You can now use a dropdown list to select a user to add their email or phone number to the alert. If an email or phone number is not already in the list, you can easily add it. An autocomplete component narrows the list as you type the name of a user.

2. Maintenance Items in Minitab Connect 7.8

3. Known Problems and Workarounds

Item 1

When using the Safari internet browser in combination with having the “Monitor User” role, your session may be logged out unexpectedly. (229698)

WORKAROUND: Use the Chrome or Edge internet browsers with this role.

Item 2

When in Preview Mode if there is one categorical slicer on the dashboard with a very high number of levels, any other categorical slicer will not be able to open the dropdown menu until a selection is made on the first slicer.

WORKAROUND: Set a preset in Edit Mode before entering Preview Mode. In this case, all options will still be present on the right-side options pane before entering Preview Mode.

Item 3

Occasionally on larger Dashboards with many Views, some of the Views may not load in correctly when opening the Dashboard or during an Auto-Update. New Assets cannot be created using those Views and any Assets associated with them cannot be edited.

WORKAROUND: Open the View in Connect and re-save it (No changes are needed). After that either close and reopen the Dashboard or enable Auto-Update.

4. Problems Resolved in Minitab Connect 7.8

The following issues are resolved in Minitab Connect 7.8

- Table/Form assets occasionally will not render on dashboards (187143)
- Issue when running multiple connection refreshes consecutively in the same flow (187079)
- Restricted characters in field names should not be created in pivot view (245786)
- Copy a record: Improved error handling (247813)
- Fields value get switched in save external web URL for integer field name (247817)
- Email Inline Attachment export: Improved validation and error handling (229218)
- Email body should support multiple lines of text (207089)
- Dashboard Alerts: Reference line operator and value are sometimes missing in alert messages when first turned on (212258)
- Phone number updated in Account Settings is not always automatically updated in saved dashboard alerts (226200)
- Reference line alerts are no longer available once linked data view is removed from dashboard (242780)
- Alerts linked to blank asset with data view removed can no longer be updated and saved (242842)
- Alerts with reference lines are not deduped on first save unless there are other changes on the dashboard (247624)
